

## AWS Cloud Consulting

### Not yet in the cloud?

SETA will assess your desired business goals and outcomes. From there, we will define your cloud strategy, complete with ROI models.

### Cloud Consulting

With key outcomes identified, we will assess your existing systems and applications for cloud viability using our proven methodology.

### Application Migration Services

We provide the fastest and most cost-effective way to migrate your applications to the cloud. Our team of experts will get you there successfully.

## Application Migration

- Migrating existing on premise data to a new cloud storage location in batches.
- Our migration experts will work with you to build a Minimum Viable Cloud (MVC).
- This MVC will become the centerpiece of your cloud strategy to prepare you for a full-scale migration.
- Cloud Architecture  
The adoption of cloud architecture is a process that requires strong collaboration for the entire enterprise. SETA's team of solutions architects will advise on how to best architect your specific business applications to meet your desired business outcomes.

## Managed Cloud Services

### Security

We have security and compliance experts who advise on best practices and provide detailed analysis on areas to improve your security for audits for compliance purposes.

### Backup and Disaster Recovery

SETA Restore is a full-featured enterprise-class backup, recovery and disaster recovery solution for Amazon EC2 Instances, EBS volumes and RDS databases.

### Cost Management

SETA will help you control AWS cloud cost by providing visibility of AWS cloud usage and utilization via management of multiple linked accounts and Tag usage for better control.

### 24/7 Support

As part of our managed services plan our team will provide 24/7 support and monitoring, full security services and ensure your environment is utilizing all available resources.
